 - Breaching the word limit of assignments and mentioning wrong word count.
- Plagiarism is another type of academic misconduct for which students needs to be aware of what constitutes plagiarism and its consequences. Students are briefed about the IMTD's plagiarism policies during the orientation program conducted at the beginning of each program. Faculty members also discuss plagiarism policy at the introductory session of each course. The plagiarism policy is also included in each course outline.

I. Plagiarism Definition

Plagiarism is the use of someone else's ideas, words, projects, artwork, phrasing, sentence structure or other work without properly acknowledging the ownership (source) of the property (item). Plagiarism is considered as academic misconduct. Students should understand what the plagiarism is and take well informed steps to avoid it.

Plagiarism can take various forms. The main categories of use of unreferenced work that could be construed as an act of plagiarism can be summarized as:

- Using someone else's quoted words without putting these words in quotation marks.
- Unauthorized borrowing of another person's idea, research work or theories.
- Failure to reference the other author's written words, quotes or definitions.
- Use of descriptions or quotations of another author without acknowledgement.
- Cosmetic paraphrasing occurs when the acknowledgement is made. The paraphrased quote is very similar to the original work.
- 'Cut and paste work' from electronic sources without explicit mentioning of complete URL. The inclusion of large amounts of pasted material, even if acknowledged, raise doubts about authenticity of student's work.

II. Plagiarism Check Process at IMTD

All work submitted by students is accepted on the understanding that it is their own. IMTD views plagiarism as academic misconduct and dishonesty. Students should adhere to high standards of academic integrity that includes referencing and acknowledging other's work, good literature review procedures while submitting assignments, projects or case studies.

For the purpose of academic discipline and penalization, three categories of plagiarism are defined on the basis of similarity index (percent of similarity). However, given the limitations of a software, evaluation shall be supervised by the concerned course faculty.

The steps followed in plagiarism checking are listed below:

- The student is responsible for submitting a proper referenced assessment.
- Faculty members are responsible for implementing the acceptable academic code of conduct through proper student orientation, citing examples of assignments, projects and thesis work that have followed proper acknowledgement and referencing standards.
- Every faculty member provides and implements strict academic code of conduct guidelines at the beginning of course.
- The CANVAS LMS portal at IMTD is integrated with OURIGINAL [previously known as OURIGINAL anti-plagiarism software (<https://www.ouriginal.com/>)]. All students' works are submitted through the LMS which has in-built plagiarism check software. Assessment submission links are available to the students through the LMS.

- OURIGINAL's ant-plagiarism system works with an ever expanding number of documents and sources classified into sources found on the Internet, articles published in academic journals and previously submitted documents. This includes everything from Wikipedia to national repositories of theses language indiscriminately (<https://www.ouriginal.com/our-products/>)

A big part of the material available on the Internet is only accessible through password-protected systems; hence, it cannot be located with the aid of an ordinary search engine. There is also a plethora of search engines, each with its own coverage. On top of this, there is a huge amount of material on the Internet that cannot be found though using regular search engines. OURIGINAL manages to find sources in all parts mentioned above.

Published material consists of hundreds of millions of books, journals, reference works, scientific articles, and so forth. Some material is accessible electronically via specific databases, whilst other material can only be found in the printed format. OURIGINAL has formed strategic partnerships with a number of leading information providers.

OURIGINAL always checks all assignments against previously submitted material. Consequently, students cannot steal another student's work nor plagiarize through means of too close collaboration.

OURIGINAL generates an analysis overview and is delivered to the course Instructor, either via CANVAS LMS or by email. The results are presented in a comprehensible, interactive analysis report so that the instructor can make the final judgement based on OURIGINAL's analysis if any plagiarism has indeed occurred.

OURIGINAL anti-plagiarism system generates originality report with percentage of similarity and the citations from where plagiarism might have occurred. The instructor uses the originality report to determine the similarity that is acceptable. The student will also be able to see the originality report. The instructor can provide the option to the students to revise the assessment upon comparing with originality report and resubmit the assessment.

If an assignment is submitted by the student through e-mail to the instructor, the instructor may login to OURIGINAL portal directly, upload the student submissions and can check the plagiarism using upload documents option.

Faculty must review the plagiarism report on case-to-case basis and decide on the final penalty to be awarded to the student.

III. Levels of Plagiarism and Penalties

A similarity of 15% or less in the submitted students' work, as detected by the anti-plagiarism software tool Ouriginal is excluded from any penalty. Similarities above 15 percent are classified in to three levels- Level 1, Level 2, and Level 3 as shown below. The level wise mark reduction are as follows:

Level	Similarity Percentage	Penalty
I	16 - 25%	This level is considered as moderately high level of similarity. For this violation, 25% of the awarded score in the written component will be deducted
II	Above 25%	This level means substantial similarity. Based on faculty's assessment about the nature of plagiarism, the faculty can award up to zero marks in the assessment
III	51% and Above	This level signifies a serious compromise with academic integrity. The concerned faculty shall refer such cases to the Disciplinary Committee through the Program Chairperson.

Faculty submits plagiarism incident report with student details as part of course portfolio. In extreme cases of academic dishonesty (including cheating, external collaboration, impersonation, Level-III plagiarism), grade XF (fail due to academic integrity violations) shall be awarded in the course.

c. Cumulative Grade Point Average

This indicates the students' average performance over all terms up to the current or final term. The calculation is done by taking the grade point total for all the courses taken till date multiplied by their respective credit hours and the result divided by total number of credit hours registered till date. Since courses carry different weights (credit hours), CGPA is computed by taking the weighted average of the course grades. For example, if a student receives grade B in a course carrying 3 credit hours and grade A+ in a course carrying 1 credit hour the GPA will be calculated as follows:

Grade	Grade Points	Credit Hours	Weight
B	3.00	3	9
A+	4.00	1	4
TOTAL:		4	13
GPA			=13/4 = 3.25

d. Incomplete Grade:

When a student has failed to complete a major component of a required course, he/she may be allotted Grade 'I' by the instructor. Students can make up for Grade 'I' by satisfying the requirements of the concerned course instructor. The final decision on an incomplete grade is up to the instructor. The incomplete course work must be completed within two weeks after declaration of the grades, otherwise, the student will be asked to repeat the course in the next offering by paying the repeat course fee and filling in the repeat course form.

XVII. Examination
